

Monochromatic Touch Controller for LED Strip 12-24 V DC

Product code:

Reference: JTM06

Technical specifications:

REFERENCE: JTM06
Rated Power : 12V - 144W ; 24V - 288W
Nominal Voltage: DC 12 -24V
Construction Material: Thermoplastic + glass
Certifications: CE - ROHS
IP : IP20
Dimensions (mm): 86mm x 86mm x 35mm
Temperature Range (°C): -20°C ~ +55°C
Warranty Years: 2

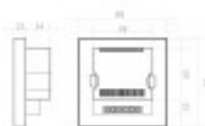

Product short description:

With this **touch controller** the management of the intensity of the brightness in your **LED strips** is now easier. It is **monochromatic** and recessed. We leave the control on your finger, so you can adjust it individually.

Product description:

Its touch system generates greater control for the user, offering the possibility of changing the amount of light in the Monochromatic LED strips. Its power depends on the watts, so at 12V the controller reaches 144w, and if it is at 24V you get a power of 288w. This controller is designed in an elegant and modern way, so that its appearance can also be used as decoration. Thanks to its state-of-the-art technology, the LED strips can be adjusted from great distances. It is ideal for interior spaces, with whether IP20, this product is suitable for home or any other type of business, with the aim of having greater control in lighting. It has 2 years warranty
