Product description:

LED module - 15W - GU10 / MR16 for Ring Downlight - CRI+92

Our LED Module can be installed in false ceilings as a GU10 / MR16 dichroic bulb.

Our module incorporates an external driver that **allows the LED to work at higher powers**, extends the life and increases the light output of the LED diode, as the heat generated by the driver does not interfere with the diode, thus increasing the life of the luminaire as a whole.

A ring is required as an accessory for the correct installation of the product.

The beam of light is of high quality due to its high **CRI+92**, and its primary angle of **36°**, which gives us the possibility of highlighting specific elements of a room; at the same time it provides us with significant savings in electricity consumption.
