

## WHITE Frame Ring - TRIPLE - adjustable for GU10 LED

### Product code:

Reference: AROB996C-B

### Technical specifications:

REFERENCE: AROB996C-B  
Rated Power : MAX. 30W LED  
Construction Material: Polycarbonate  
Base: GU10 - MR16  
Certifications: CE  
Dimensions (mm): 93 x 255 x 25 mm  
Cut-out Size (mm): 75 x 235 mm  
Warranty Years: 3

### Product short description:

**The triple adjustable Marco BLANCO ring for two GU10 bulbs in polycarbonate** is an elegant and functional solution for interior lighting, while also allowing for its placement in high humidity areas and coastal saltwater areas, as it does not deteriorate like metals. The design allows for adjusting the direction of light, making it ideal for highlighting specific elements of a room or creating a pleasant atmosphere in any space. Super easy installation. Withstands coastal and high humidity areas without deteriorating as it is made of PC.

### Product description:

WHITE Frame Ring - TRIPLE - adjustable for GU10

The adjustable TRIPLE White Marco ring for three GU10 bulbs in polycarbonate is an elegant and functional lighting accessory designed to provide flexible and precise lighting solutions for interiors.

One of the main advantages of the adjustable triple white ring for two GU10 bulbs is that it allows you to use up to three GU10 bulbs instead of one or two. This means you'll get even more intense and wider lighting compared to lower-capacity rings. If you need a higher amount of light or want to cover a larger area, the adjustable triple ring will provide you with greater luminous power and a more uniform distribution of light in the space. Additionally, being adjustable, you can individually adjust the direction of each ring to adapt the lighting to your specific needs, offering greater flexibility in designing the lighting of your environment.

The Triple White Marco ring for two GU10 bulbs, made of polycarbonate (PC), presents several advantages for use in humid or coastal areas:

- **Moisture resistance:** The PC material used in manufacturing the ring has moisture resistance properties. This means it can withstand high humidity conditions without damage or corrosion, making it suitable for use in areas with higher humidity levels.
- **Corrosion protection:** Being made of PC, the Triple White Marco ring is resistant to corrosion caused by exposure to saltwater in coastal areas. This allows it to maintain its appearance and functionality even in aggressive marine environments.
- **Durability:** The PC material used in its manufacturing is known for its durability and impact resistance. This makes the ring capable of withstanding adverse conditions such as strong winds, water splashes, or sand, typical in coastal areas.

This ring is specifically designed to accommodate up to three GU10 bulbs and LED modules, which can be easily installed and replaced thanks to its simple and secure fastening mechanism.

At FactorLED, we ensure that our products are of high quality and provide all the necessary elements for distribution, import, or wholesale, including the technical specifications of each LED product.
