

LED Controller 3 in 1 RGB + RGBW + RGCCT - RF 2.4 GHz

Product code:

Reference: 92061-E3-RF

Technical specifications:

REFERENCE:
Nominal Voltage: DC 12 -24V
Colour: RGB+CCT
Dimmable: YES
Certifications: CE - ROHS
Frequency (Hz):
Temperature Range (°C): -10°C ~ +40°C
Range (m):

Product short description:

The 3-in-1 LED Controller (2.4 GHz) is an efficient device for managing LED lights, featuring tool-free installation and compatibility with Mi-Light/MiBoxer controllers. It offers control up to 30 metres and allows you to adjust brightness and colour temperature. With one button, you can switch between RGB, RGBW and RGB+CCT modes, providing flexible and customised lighting.

Product description:

LED Controller 3 in 1 RGB + RGBW + RGCCT - RF 2.4 GHz

The 3-in-1 LED Controller (2.4 GHz) is a versatile device designed to manage LED lighting efficiently and flexibly. Among its most outstanding features are:

Instant wiring without tools: This controller facilitates installation thanks to its design that requires no additional tools, allowing for quick and easy connection.

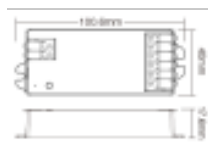

Mi-Light/MiBoxer remote control compatibility: Operates on the 2.4 GHz frequency and is fully compatible with Mi-Light and MiBoxer series remote controls, offering seamless and convenient integration for the user.

30-metre control distance: Offers a wide control range of up to 30 metres, allowing the lighting to be operated from a considerable distance.

Adjustable brightness and colour temperature: Allows adjustment of both the brightness and colour temperature of the LED lights, offering complete customisation of the lighting to suit different needs and environments.

Switching output modes: It has a button that allows switching between three different output modes: RGB, RGBW and RGB+CCT. This provides greater flexibility to tailor the lighting to suit the user's preferences and the requirements of the environment.
