Product short description:

Easily transform your slim panel into a surface-mounted ceiling light with this converter ring, compatible with models **PLR20WOSR**, and **PNOSR24W**. This accessory enables quick and secure surface installation, ideal for ceiling lighting projects where a ceiling light style is preferred. Made of high-quality materials to ensure durability and a perfect fit. Convert your lighting fixture into an elegant ceiling light hassle-free!

Product description:

Converter Ring from Slim Panel to Surface-Mounted Ceiling Light

The **Converter Ring from Slim Panel to Surface-Mounted Ceiling Light** is an innovative solution designed for those who want to transform a slim panel into an elegant surface-mounted ceiling light, without complex installations or ceiling modifications. **Compatible with references PLR20WOSR, and PNOSR24W**, this ring is ideal for maximizing the versatility of your lighting fixtures, adapting them to projects with more sophisticated styles or applications that require surface lighting instead of recessed.

This accessory is made with high-quality materials to offer exceptional durability and a perfect fit. In addition to its aesthetic and discreet design, it allows quick and secure installation, providing flexibility in residential, commercial, or office projects. With a modern look and professional finish, this ring is a practical and efficient option for projects that require a quick and elegant lighting change.

Advantages of the Converter Ring from Slim Panel to Surface-Mounted Ceiling Light

- 1. Simple and Effective Transformation:** Easily convert any compatible slim panel into a surface-mounted ceiling light without complex modifications or additional installations. Simply place the ring, mount the fixture, and enjoy a new style.
- 2. Wide Compatibility:** Specifically designed to work with models like PLR20WOSR, and PNOSR24W, this ring converts high-efficiency panels into ceiling lights, offering versatility in any setting.
- 3. Aesthetic and Professionalism:** With a clean and modern design, this converter ring adds an elegant and professional look to fixtures, adapting to various decorative styles, from homes to commercial spaces.
- 4. Durability and Quality Materials:** Made with high-strength materials, this ring ensures a long lifespan and maintains its aesthetic quality, resisting wear in high-traffic installations like offices, hallways, and commercial areas.
- 5. Easy Installation:** The ring installation is quick and secure, reducing setup times and simplifying the fixture configuration, ideal for projects that require agile solutions.
- 6. Adaptability to Surface Spaces:** Enables a recessed fixture to become a surface-mounted one, providing a versatile option that broadens the range of use in ceilings where recessing is not possible or where more prominent lighting is preferred.

With the **Converter Ring from Slim Panel to Surface-Mounted Ceiling Light**, you optimize your lighting fixtures' performance and adapt to any space's needs. This is an innovative option that transforms the way lighting projects fit into each environment's design and functionality.
