# Cable for RGB + CCT LED strip 12-24V 6 wires - 1 meter - 6X1.75mm

Product code:

Reference: FL1693-RGB-CCT

Technical specifications:

REFERENCE: FL1693-RGB-CCT
Nominal Voltage: 24V DC
Construction Material: PVC + Kupfer
Certifications: CE, CMIM, RoHS
Dimensions (mm):
Temperature Range (ºC): -15º+70º
Warranty Years: 3

Product short description:

Cable for RGB+CCT LED strips 12-24V with 6 wires! Designed to ensure **an efficient and secure connection**, it features **1.75mm² section and 10.5mm width**, ensuring **stable transmission and optimal performance**. Available in **50m spool or from 1m**, depending on your needs. **Quality and flexibility at the best price!**

One unit equals **1 meter**.

Product description:

Cable for RGB + CCT LED strip 12-24V 6 wires - 1 meter - 6X1.75mm

If you're looking for a **reliable, durable cable designed for high-performance installations**, the **cable for RGB+CCT LED strips 12-24V with 6 wires** is the perfect choice. Its design ensures **a stable and efficient connection**, ideal for lighting projects requiring **full control over color temperature and light intensity**.

Made with **high-quality materials**, this cable provides **optimal conductivity and durability**. It guarantees **low voltage drop**, making it **the best choice for installations requiring greater efficiency and consistent performance**.

Key Features

✔ **6 wires for RGB+CCT connections**: Allows control of RGB LED strips with color temperature adjustment (warm and cool white), offering **greater lighting versatility**.
✔ **High quality and durability**: Made from **premium materials** to ensure **excellent conductivity and wear resistance**.
✔ **Optimal energy and signal transmission**: Thanks to its **1.75mm² section**, it prevents **voltage losses**, guaranteeing **maximum performance in 12-24V installations**.
✔ **Universal compatibility**: With **10.5mm width**, it is compatible with **most LED profiles on the market**, making integration easy for any project.
✔ **Flexible and easy to handle**: Its design allows **quick and simple installation**, adapting easily to different spaces.

Recommended Applications

 RGB+CCT LED strip installations (12-24V) for indoor and outdoor use.
 Lighting for homes, offices, stores, and architectural projects with color temperature adjustment.
 Connections in smart home and lighting automation systems.
 Use in LED profiles for a clean and professional finish.
