# Red Filter for LED Lighting

## **Product code:**

Reference: 0208

#### **Technical specifications:**

REFERENCE: 208

Construction Material: Polycarbonate

Beam Angle (º): 60º Certifications: CE - ROHS

Dimensions (mm): 1.220x500/1.000/1.500mm

Warranty Years: 2

### **Product short description:**

The **red filter** is especially suitable for decorating rooms with a distinguished and modern touch. This **filter** is approved and especially suitable for places where you want the **red color** to stand out above all. (106)

AVAILABLE IN MORE COLORS

#### **Product description:**

Red Filter for LED Lighting

Our filters for LED luminaires are composed of a dichroic filter which is formed by a transparent sheet. This transparent film has a reflective coating on one of its surfaces that reflects the light to be filtered. By varying the number and thickness of these layers, the filter can be adjusted to the desired shade.

These filters offer unparalleled color purity, stability and longevity, making them an ideal decorative solution. Importantly, they have an accurate and consistent color from batch to batch.

The red filter is especially suitable for decorating rooms with a distinguished and modern touch.

They are sold in sections of 1.22m x 0.5m, 1.22m x 1.5m, 1.22m x 1m.

All filters are approved.
